

Vote Tampering In Colorado—Explosive New Report

CONTACT: Media@Unite4Freedom.com

DATE: February 16, 2026

Tampering with federal election results is against the law, and a new study by Unite4Freedom exposes an explosive problem—federal election records of the vote are changing after the election has been certified. Is this Malice, Ignorance or pathetically pervasive Apathy (MIA) by our election officials?

Tina Peters Was Right

Harassed, prosecuted, and convicted by the state of Colorado for defying *unlawful* orders from Colorado Secretary of State Jenna Griswold, Tina Peters is living out a nightmare no American should ever experience. Confined to a Colorado jail, Tina is serving an excessive and unwarranted prison sentence because she had the courage and integrity to follow federal law requiring her to preserve the Mesa County 2020 election records.

The Unite4Freedom Colorado Vote Tampering Report is clear—illegal changes were made to individual voter history records AFTER certification of the 2020, 2022, and 2024 elections. Tina knew something was wrong, and we have the evidence to prove it.

How it Works

Thousands of changes have been documented by Unite4Freedom data analysts by comparing snapshots of certified federal election records. Each snapshot is the moment in time when the record was downloaded from the State database. These snapshots are auditable items required to be retained and should not change after an election has been certified, but voters literally disappear by the thousands while others are added.

Are these error corrections, which tell us the certification was election fraud? Or are they part of a massive coverup?

We do not know how voters voted, but we do know that tampering with federal records behind closed doors without a transparent adjudication process is an apparent crime.

Our great [team of data analysts](#), applying forensic standards and a peer reviewed process, documented over 300,000 changes in 2020 AND over 150,000 in 2022 by comparing three snapshots. In 2024, comparing only two snapshots, that number was 3,416. Will future comparisons of 2024 snapshots reveal hundreds of thousands of changes, as they did in 2020 and 2022? Or will patriots looking over their shoulders deter future changes? What will the FBI find if they seize all of Colorado's records and meticulously audit them, one by one?

Unite4Freedom analyses are evidence of a potential crime at the highest levels of Colorado government. We the People demand a full criminal investigation, and that Tina Peters be set free by Federal action pending the outcome of that investigation.

While we can only see artifacts of the apparent election fraud, criminal investigators will be able to see it all. As always, Unite4Freedom will share all our data, line by line, with law enforcement and courts of competent jurisdiction.

How Do We Know Who Won?

This is not rhetorical. It is the operative question.

If the election was lawful and the results were legitimately certified, why are changes being made to the records after certification? If corrections were required post-certification, how could the election have been certified as accurate?

There is no third option.

Election certification is not symbolic as portrayed by the media and pundits. In fact, it is a formal legal act, whereby government officials (supposed servants of the public!) attest that the election was conducted lawfully and that the results are accurate.

Unite4Freedom's Vote Tampering reports are evidence that the election results are being manipulated at the State level, by parties unknown, and Colorado executive and election officials are MIA! And, in one of the most outrageous cases of political prosecution in the country, Tina Peters has been given what is essentially a death sentence.

Again, how do we know who won? What are the downstream consequences of invalid elections? We all know in our hearts.

Corruption, Chaos, and Consequences

Fraudulent elections lead to chaos. Taking advantage of our fears, powerful interests sow division and chaos. They steal our liberty and prosperity, enriching themselves, while draining our economy of its vitality. A quick glance at the news cycle affirms this. Corruption and tyranny flourish when officials are not accountable to voters.

Illegal changes to voter participation histories AFTER election certification

The counts below reflect the number of illegal changes made to individual voter history records after an election was certified. The top data set in each election chart includes illegal changes to vote participation history for voter records that exist in both voter record copies being compared. The second data set in each election chart includes the illegal additions or deletions of entire voter profiles and their associated voting participation histories for that election. Each instance documents modifications made to official federal records after the final certification of the election.
